

Animal and Poultry Sciences

The APSC Graduate Program would like to meet the requirement for diversity and inclusivity training by requiring students to take GRAD 5214, Diversity in a Global Society or ALS 5024, Building Multicultural Competence in Agriculture and Life Sciences. This will be part of the core requirements for our grad students that includes GTA workshop (GRAD 5004), grad seminar (APSC 5004) and Professional Development (APSC 5124). Students also are required to complete CITI Training.
